Dear Hiring Manager,

I am writing to express my strong interest in joining your organization. As a Senior Software Engineer - Cloud Security (Azure | Microsoft 365) with over five years of experience specializing in Microsoft cloud security, I am confident that my technical expertise and hands-on background across Azure, Microsoft 365 and on-premises environments would make a meaningful contribution to your team.

In my current role I design and maintain security assessment tools that gather and analyse data across Azure and Microsoft 365 using REST and Microsoft Graph APIs. My work spans C# and ASP.NET Core development, PowerShell automation and SQL, along with building Copilot Studio AI agents for identity and risk management, Microsoft Sentinel and Microsoft Defender for Cloud. I have also developed and published security solutions on the Azure Marketplace and led client deployments in secure environments.

What sets me apart is the combination of software-engineering discipline with a security-first mindset. I enjoy turning complex security requirements into automated, reliable tools, and I take pride in delivering clear, actionable reporting that helps organizations strengthen their security posture and remain compliant.

I would welcome the opportunity to discuss how my skills and experience align with your needs. Thank you for taking the time to consider my application. My resume is attached for your review, and I look forward to the possibility of contributing to your team.

Sincerely,

Aashish Goley

Senior Software Engineer - Cloud Security (Azure | Microsoft 365)
